WEST SPRINGFIELD, MASS.

Established February 23, 1774

Form of Government

Elective Town Meeting System.

Population

U. S. Census 26,308 (1960) (unofficial).

Population of Age

Males 49.6%, Females 50.4%.

Area

17 sq. miles.

Average Temperature

27.5 degrees (Jan.), 73.1 degrees (July).

Parks

4 with 97 acres valued at \$300,000. 1 outdoor swimming pool.

Assessed Valuation

\$74,259,976.00.

Tax Rate

\$48 per \$1,000 (1960).

Bonded Debt

Town's bonded debt is \$4,060,000.00 (Jan. 1, 1961).

Post Office Receipts

\$501,090.44 (Fiscal, 1960).

Church Buildings

14 with 7 denominations.

Building and Construction

Building permits issued valued at \$3,173,-015. Number of permits issued 1959 307.

Industrial

Number of establishments 68, employing 4,200 men and women paying wages of \$22,900,000 annually.

Banks

2 commercial banks and trust companies, 1 co-operative bank—1 savings bank.

Trade (Retail)

Retail territory serves 100,000 people within a radius of 10 miles totaling \$40,000,000.

Newspapers

West Springfield Record.

Radio Broadcasting Stations

WTXL

Principal Products

Paper, fibre boxes, machine gears, chemicals, paints, gasoline pumps, tin, solder, type metal, wood boxes, bound books, farm produce, magnetos, machine tools, trailer truck accessories, wrapping paper machinery and hair tonic.

Motels

Seventeen motels with accommodations for 1,000 people.

Railroads

NYC, Boston & Maine.

Amusements

One theatre, with a seating capacity of 850; 2 outdoor theatres.

Educational

Number of schools 14, including 2 junior, 1 senior high schools and 2 parochial schools. Number of pupils in public schools, 5,000, in parochial schools, 1,000. Number of teachers in public schools, 185; in parochial schools, 28.

Public Library

One containing 43,820 volumes. Circulation, 110,000.

"What You Should Know About Your City"

"The helpful kind of patriotism is the kind that grows out of a knowledge of one's town, of her growth, her people, her property, her government and her needs. This knowledge develops, first, an intelligent interest; then, a sympathy; then a reasonable affection: a wise and temperate jealousy for her good name and a wish that she may prosper and grow more beautiful: and, finally, a desire to help her to become greater and finer, a bright and clean workshop and a home for the best of men and women."—John Cotton Dana.

HISTORY

The West Springfield that was and that is

West Springfield, Massachusetts, first off-shoot from Springfield, the "Mother Town," was the largest, most important settlement of this region. The first permanent house was built here about 1654. It became a separate parish in 1696. Its first church and its first school house were built in 1740. The attempt was made to incorporate it as an independent township in 1756 but not until February, 1774, was the incorporation accomplished. Exactly a month later in March of that year, the first town meeting was held in the old First Church (built 1702), on the common.

Before incorporation, the town numbered only a few houses scattered along "Shad Lane" now Main Street, southward to the old "Ferry Lane" now East School Street, thence extending by winding course to the Agawam River giving the route of George Washington's two journeys through West Springfield, and ending where the outlines of the old Agawam "ferrying-place" are yet plainly visible on the river bank near the Hamblen place.

West Springfield up to 1810 contained a greater population than the mother town and was for years the mainstay and support. Within the limits of the original territory of this settlement, William Pynchon and his associates planted their colony in 1636, but later moved to the east side to avoid floods. In 1653, the proprietors made an allotment of lands on the west side of the river, which were not occupied at once, but used as meadows and pastures. Gradually the settlers crossed over to build homes on the rich bottom lands. In 1696 the second parish, comprising three districts, Agawam, the Street and the Chicopee plains, was established on petition of the inhabitants. In 1774, West Springfield applied for and was granted the full powers and privileges of a town. Its original territory extended from the Connecticut state line to the fort

of Mt. Tom and included the richest lands of the Mother town.

West Springfield has grown much in the 181 years since its incorporation. According to census figures, Springfield had grown enough when it had started to rival the population of its west-side daughter, to reach a more even balance. For example, the population of West Springfield as late as 1820 reached 3246, while Springfield was only 668 ahead! A closer balance than the two will never again reach! Because of the fear that it might bring an undesirable class, if the project of having the proposed United States Armory on the West Side was carried out, the town's golden opportunity had been passed! Thus supremacy in population, as well as greater industrial and commercial prosperity became settled on the East Side, where it has since remained!

OLD FIRST CHURCH OF THE COMMON

The old First Congregational Church on the Common, nearly opposite the present Town Hall, (see historic boulder, marking the location), was erected within four years after the formation of the parish, as the date stated on the quaint gilded rooster weather vane, 1702. The building was 42 feet square, and with its gable-topped, "two-story" tower, was 92 feet in height. The architect was the veteran builder, John Allys, of Hatfield. The vane was said to be of precisely the same height and size of the imported-from-England bird which has been performing similar duty on the tower of the First Congregational Church in Court Square, Springfield. It was said to have been purchased at the same time, with three others, made by the English coppersmith.

The first story constituting audience room and galleries, with three outside doors, and two windows each side of the doors with corresponding windows above them to light the galleries and upon each of the four roofs projected a dormer gable with a

window. The pulpit, on the north side in place of a door, was lighted with one window on each side. Above this story was another much smaller than the first, having one window on each side and high roofs and gables like the one below, upon this was a third story smaller than the second with roofs and gables, the body portions of this story having on each side an opening to serve the purpose of a bell-room.

A drum was used for 41 years and then a bell was procured and used for 18 years when its tones were ruined in like manner and re-cast and replaced in its place in the tower; in 1802 it was transferred to the new church on the hill; it was re-cast in 1825 to enlarge its size. The building was clap-boarded but never painted. All the windows were small with leaden sash glazed with diamond shaped glass.

All of the interior of the first story was all open, exposing to view beams, studding, rafters and

outside boarding, no inside finishing above window stools, the floor was laid at the bottom of the sills making it necessary to step over the sill to the floor. Two flights of stairs led up to the galleries in the south easterly and south westerly corners, starting each side of the door. Around the walls were 15 large square pews, in the central part were two rows of long slips fronting the pulpit with, a partition between them, one division being occupied by the men the other by women, one aisle on the east and one on the west side. Pulpit, pews and railing of oak and yellow pine, of the size, style and height of the pulpit nothing is definitely known, it was furnished with a sounding board.

This unique house of worship was occupied for a century without plaster or paint, or was ever a fire

built within its walls, the women using foot-stoves with live coals. In 1748 Mr. Obadiah Frary, of Northampton, constructed a wooden "Meeting House Clock" and it was placed in the tower and was used for 25 or 30 years, when it became unfit for use and was removed. The building being sadly in need of repairs, the parish gave the people liberty to make repairs which was done at expense of nearly \$600.00; it was used 16 years after this, when it was abandoned for the new church on the hill, June, 1800, for which the contract price was said to have been \$1400.00 and 10 gallons of St Croix Rum, valued at \$60.00; no rum was used, its value in money divided among the men. 6 to 10 men were employed, and the contractor, Timothy Billings, thought he made \$4.00 a day.

MITTINEAGUE METHODIST CHURCH

West Springfield is proud of its many churches and of the important part they play in the life of this residential community. Their varied adult and youth programs have been cited for stimulating interest in town affairs and providing wholesome outlets for the youngsters.

The new Mittineague Congregational on Westfield Street has been hailed as one of the most modern in design of the 14 churches in town, which represent seven denominations. However, it is contrasted by its sister churches which represent the growth of West Springfield over its 325 year history.

Town churches not only provide a meeting place where residents worship according to their own beliefs, but also host many school and civic groups under their roofs.

FIRST BAPTIST CHURCH

THE PUBLIC LIBRARY

In 1775, a library was established in West Springfield through the efforts of Rev. Dr. Lathrop, the pastor of First Parish, and John Ashley, a public-spirited citizen. There were 50 volumes in this collection, they were carried from house to house in a two bushel basket. It was considered a high honor to have the Library in charge. Beginning about 1850, the Library was in charge of the Town Clerk, during the long service of John M. Harmon. It was conducted from his home on Westfield Street, later from a room in the Town Hall assigned for library use. The annual appropriation was \$50 plus the dog tax. By a payment of 50 cents a year, books could be drawn out on the first and third Monday of each month. Later the hours of opening were increased and the annual fee abolished. In 1887, a librarian, D. G. White, was appointed, who served until his death in 1913. The present building was completed in 1916 at a cost of \$25,000, the gift of the Carnegie Corporation. It is erected on a site

purchased by the town from William and Edwin Leonard, and maintained by an appropriation made annually by the town. In addition there are four trust funds the income of which is used to purchase books; the Daniel Granger White Nature Library, the Martha D. S. Ludington Fund, the Lillian Trask Williamson Fund for the purchase of reference books and books of travel, and the Josephine Pokorny Czecho Slovak Library for the purchase of books in the Bohemian language and books about Czecho Slovakia.

The building is open from 10 a. m. to 8 p. m. daily except Sundays and holidays. There are branch libraries in the Community Y. M. C. A., the John Ashley School, the Memorial Avenue School and the Riverdale School. Each of these is open one day a week in charge of an assistant from the central library. In 1960, the total number of volumes was 43,820 and the circulation for the year 110,000. An addition added in 1959 to the main building.

EASTERN STATES FARMERS' EXCHANGE

Skies on both sides of the Atlantic were becoming overcast with the clouds leading inevitably to war, when then this truly great world movement was quietly launched. Rev. John A. Sherley, a Bennington County (Vermont) Minister secured ready and sympathetic cooperation of the paper-manufacturer, Horace A. Moses. From the beginning, these two genuine philanthropists have worked untiringly and whole-heartedly for greater improvement in farm life and general community betterment. It was most fortunate the same broad motives have actuated both men. Mr. Moses has continuously and consistently counted Agriculture among his fields of manifold activity. The happy combination of Mr. Moses and Mr. Sherley quite promptly resulted in 1913 in the incorporation of the now-famous Hampden County Improvement

League, whose large and commodious building on Memorial Avenue is a worthy landmark which now speaks for itself. An important outgrowth of this active philanthropy was the formation in January, 1918, of the Eastern States Farmers' Exchange. Touching further important upward steps of continuous progress came the Eastern States Agricultural Credit Corporation, organized August, 1923.

These several remarkable aggregations of man and means has resulted in establishing an "Exchange" like no other, anywhere, most effectively rendering material aid in modern Agriculture, now employing several hundred persons, and all accomplishing the same beneficent ends as those anticipated more than twenty years ago by its far-sighted founders.

EASTERN STATES FARMERS' EXCHANGE

The Eastern States Farmers' Exchange, Incorporated, founded in 1918, established headquarters in West Springfield in 1928. This is a cooperative association of farmers in nine northeastern states. The Exchange operates two feed, four fertilizer, and two insecticide production units. It grows seed in states across the country and in foreign lands, and operates 82 regional distribution depots, including one in West Springfield.

HAMPDEN COUNTY IMPROVEMENT LEAGUE AND JUNIOR ACHIEVEMENT

The Hampden County Improvement League, the agency which carries extension service to the people of Hampden County was founded by Mr. Horace A. Moses, on January 25, 1913. The aims of the organization as set forth in the bylaws are "to foster, encourage and promote all things in the communities of Hampden County which tend to increase the productivity of the soil, or to advance or conserve the educational, civic, moral and religious welfare of the communities." The League has assisted in the organization of extension work in twenty-four counties in New England, New York and Pennsylvania. In October, 1925, the League moved into a building of its own on the grounds of

the Eastern States Exposition, given by President Moses.

The success of the 4-H Clubs in various parts of the country, prompted Mr. Moses to start something of the kind here.

The movement had the support of prominent men from the start. The late Theodore Vail assisted Mr. Moses in financing it, while President Calvin Coolidge was warm in his indorsement of the movement. The Rotary Clubs of the Nation raised \$50,000 to assist Junior Achievement, and the entire country east of the Rocky Mountains, has felt its influence. In 1925, the Junior Achievement Building was erected on the Exposition grounds. This building was also the gift of Mr. Moses.

STOROWTON VILLAGE

On The Eastern States Exposition Grounds

Storowton, the gift of Mrs. James J. Storow of Boston, to preserve for posterity the peaceful charm and beauty of early New England village life, is

the most *unique* village in America. The original Early American buildings grouped around the elm shaded green were chosen for this restored village

EASTERN STATES EXPOSITION is the largest agricultural exposition east of the Mississippi. Each year over 500,000 visitors see this famous fair which runs during the third week in September.

after painstaking search was made throughout the earliest settled regions of New England. Once found, each building was taken down, board by board, and then reassembled to the last detail at Storowton, as they were first erected a century and a half ago.

Old Storowton Tavern originally served the weary traveler in the hill town of Prescott, Massachusetts, as the Atkinson Tavern. It was built by John Atkinson shortly after the Revolution, upon his discharge from the Continental Army. The second floor has a large hall extending the entire length of the main building with a fireplace formerly used to heat it. In the old days, this was the most commodious space in the town of Prescott, Massachusetts and was frequently used for dances and other activities. The Old Country Store, always a part of Atkinson Tavern, is still a part of Old Storowton Tavern.

Looking across the green past the white entrance gate, one sees the Gilbert Homestead, once a farm house in the Massachusetts town of West Brookfield. To the left of this is the Potter Mansion, (with the tiny Eddy Law Office in between). This mansion, built entirely with his own hands, belonged to another Revolutionary War soldier, Captain John Potter of North Brookfield, and was completed in the late 1700's. Delightful rooms are available in the Potter House for overnight guests. In back of the Potter Mansion may be seen the great Stagecoach Barn in which coaches once put up over night at Greenwich, Connecticut, on the journey from Boston to Albany. Looking to the far left cor-

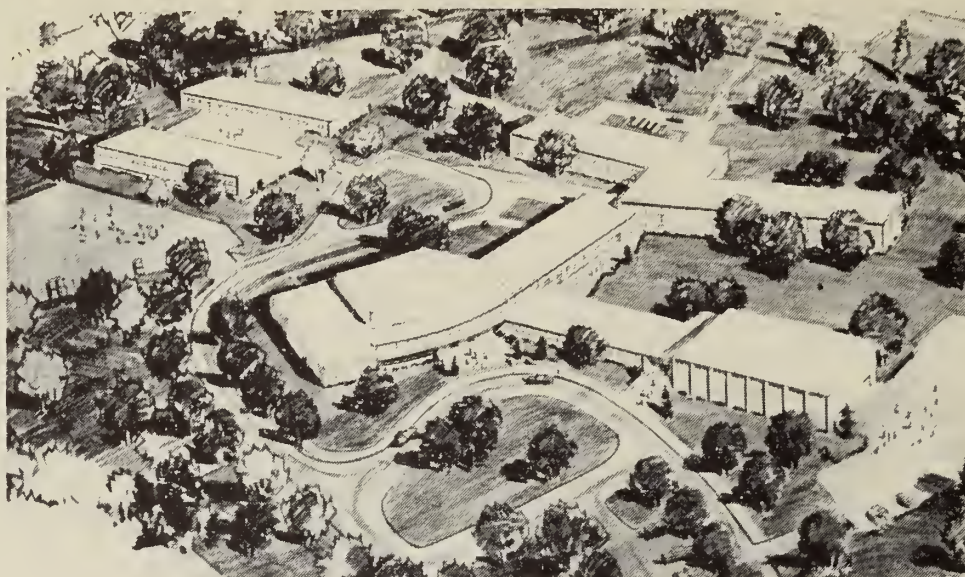

ner one may see the Village Blacksmith Shop from Chesterfield, New Hampshire, and next to it the Little Red School House where, for more than 100 years, the children from Whately, Massachusetts, learned their three R's.

Dominating the village at the far end and raised by a low terrace from the level of the green, is the Salisbury Meeting House. The way in front is appropriately named "Sabbath Street." In this fine example of early New England church architecture may be found one of the oldest hand-made organs in the country. To the left of the meeting house is the oldest of the village restorations, the lovely gambrel-roofed Phillips House. This fine house was built in Taunton, Massachusetts in 1767. The Old Town Hall has now been joined to Atkinson Tavern to make the Old Storowton Tavern as you see it today.

In season, there are still square dances in the great Stagecoach Barn with the old fiddler "calling" for the contra dances and quadrilles; and, that famous old New England sport, Bowling-on-the-Green. Located as it is on the grounds of the Eastern States Exposition, Old Storowton Tavern is close to many events continually planned in the buildings of the Exposition. The Garden Show is a regular annual event, as well as a Home Show, Horse Show and various other shows; a circus, hockey and basketball games. Nearby, in the historic Pioneer Valley, are many places of interest for the visitor.

We will be only too happy to arrange a tour of Storowton Village or give you directions to any points of interest in the Valley.

SCHOOLS

WEST SPRINGFIELD SENIOR HIGH SCHOOL

The High School on Piper Rd. is located close to the street to achieve economy in the installation of utilities, service drives, etc. There is an entrance from Piper Rd., and one from Amostown Rd., both leading into parking areas to allow parking automobiles away from the highway.

Approaching the Piper Rd. entrance, you face the auditorium on your left, and the gymnasium on your right, with administrative offices connecting the two and facing on Piper Rd. Connecting the auditorium with the academic wing is the two-divisional cafeteria, seating a total of 500 pupils (during school hours) or the same number of adults at community events (after school hours). The auditorium seats 1,100, and is adequate for community needs as well as school functions. The stage is sufficiently large to accommodate school, amateur or professional theatricals, concerts and the like. The auditorium is serviced by ample dressing rooms, storage areas, band practice room and small group practice rooms. There is an attractive lobby facing Piper Rd.

The gymnasium seats approximately 850 at a basketball game or other indoor athletic events. For classroom purposes it divides into three sections for multiple use by various physical education classes, in addition to which there is a room for

small-group educational activities. There is plentiful storage at either end of the gymnasium.

The academic wing (connected to administrative offices, auditorium and gym by the cafeteria section) is made up of sufficient classroom space to properly care for the multitude of subjects required in the modern High School program. There are rooms of varying sizes to fit the subject needs.

The building itself is of red-brick veneer over cinder blocks. It is both practical and economical, with widespread use of directional glass block and clear glass to provide natural lighting. Floors are of asphalt tile, except in the shops; ceilings are acoustically treated tile.

There are satisfactory areas to meet the needs in Homemaking, Industrial Arts and Art. The Building Committee recognized a need for these courses which stir a vital interest and enthusiasm on the part of many students not interested in a strictly academic program. For boys, there are adequate areas designed for Graphic Arts, General Shop, Agriculture, Metal Work, etc.; and, for the girls there are areas for advantageous teaching in Foods, Clothing, and Homemaking.

Thus every effort was made to plan a new High School from which our young people will come forth well-educated, and to which our older citizens will go forth for their many fraternal and community activities.

JOHN R. FAUSEY SCHOOL

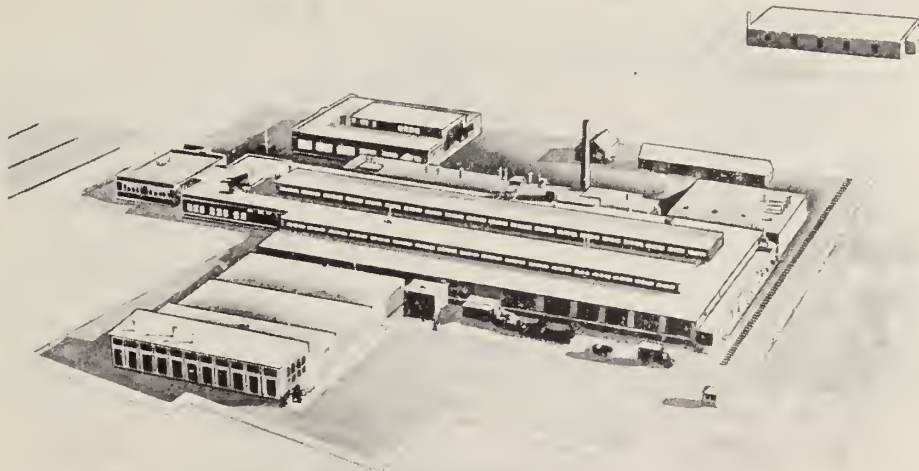

ST. THOMAS PAROCHIAL SCHOOL

WEST SPRINGFIELD HAS GROWN RAPIDLY—DOUBLING ITS VALUATION BETWEEN 1940 AND 1960 AND CONTINUING A WELL-BALANCED GROWTH

INDUSTRIAL

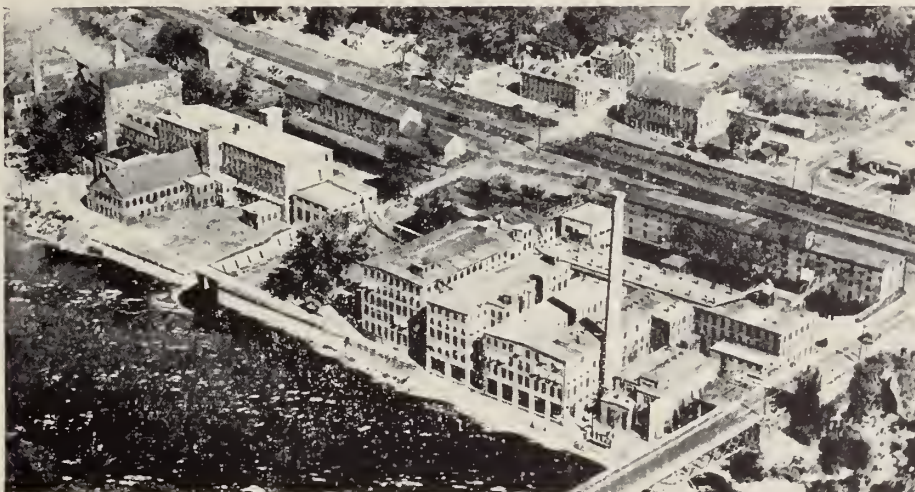

West Springfield, because of its ideal location as an industrial center, has attracted outstanding and nationally-known industries to the community.

WICO IGNITION DIVISION GLOBE UNION CORPORATION

The Wico Electric Company introduced the first storage battery in 1897. Since that time magnetos, distributors, complex ignition systems, and other allied precision products have been produced by them. The modern 125,000 square foot one-story

plant is designed for economical production with assembly line speed, and is located on the Boston and Albany Railroad and close to excellent trucking facilities.

STRATHMORE PAPER COMPANY

The Strathmore Paper Company mills in West Springfield turn out many of the letterhead, printing, technical, and artist papers that have made the name "Strathmore" synonymous with "quality

papermaking" throughout the world. A Strathmore subsidiary, the Premoid Corporation, manufactures various grades of artificial leather and paper-based specialties.

RESIDENTIAL

People from all sections come to live in West Springfield, which has fine residential areas, with easy access to fine schools, churches of all faiths,

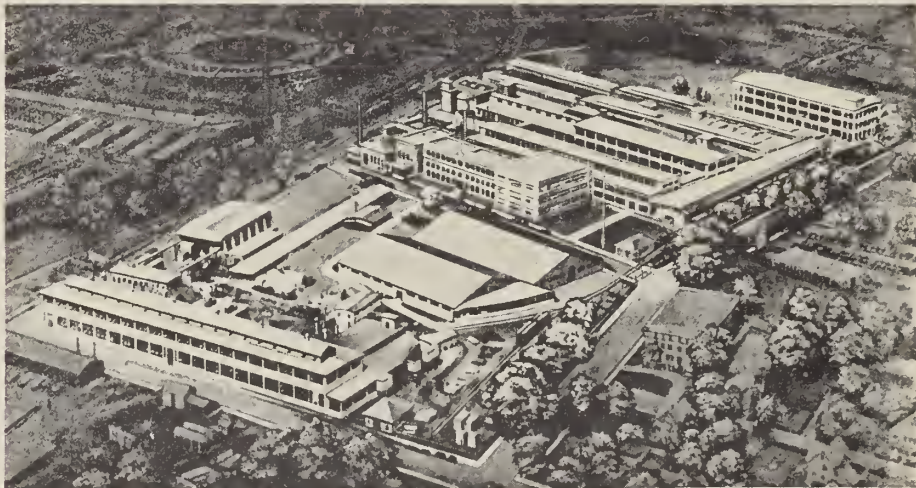

stores, and factories. All of the well-established utilities are available to encourage a rapid growth of high quality homes.

WESTERN MASSACHUSETTS ELECTRIC COMPANY OFFICE BUILDING

Western Massachusetts Electric Company furnishes electric service to over 120,000 customers in 55 cities and towns in Western Massachusetts. Its new and modern 96,000 kilowatt steam generating

station is located in West Springfield. The company is by far the largest taxpayer in the town, accounting for about 20% of the total assessed valuation.

GILBERT AND BARKER MANUFACTURING COMPANY

The 21-acre plant of Gilbert and Barker Manufacturing Company, a subsidiary of Standard Oil of New Jersey, produces Gilbarco oil heating equipment, service station equipment, and equipment for

Petroleum bulk plants and terminals, known and used in every country on the globe where gasoline and oil are marketed.

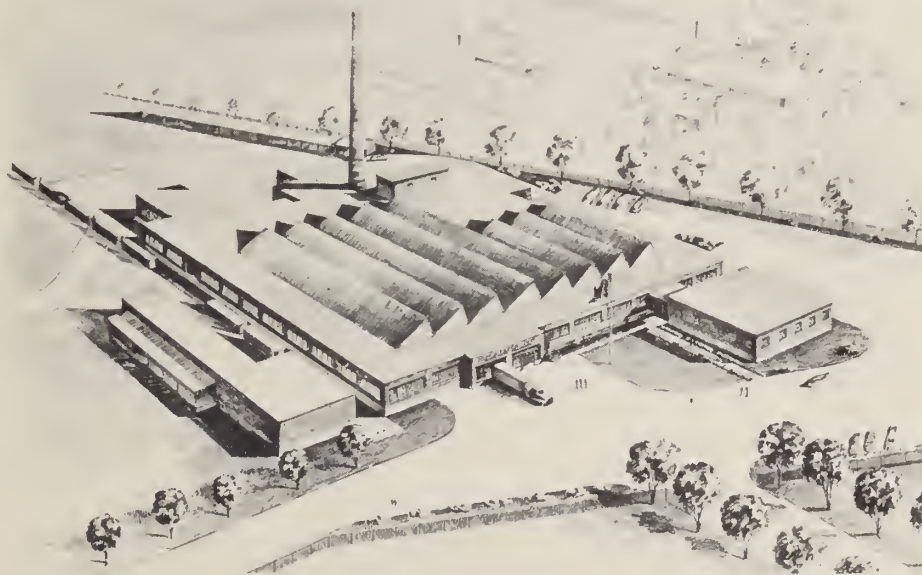

COMMERCIAL

Because of West Springfield's ideal location, and other inducements, leading commercial establishments have come here to operate.

SEARS & ROEBUCK RETAIL STORE

Sears & Roebuck built one of their largest, most modern retail stores in West Springfield, with a 600 car parking area. Although a recent addition to the town, this new location has proven very satisfactory and convenient to both West Springfield and Springfield shoppers. Sufficient and easily accessible parking space is a factor in drawing the large trade that this store does.

JOHN H. BRECK INC., MANUFACTURING PLANT

John H. Breck, Inc., founded in 1907, has its main manufacturing and warehousing facilities in West Springfield. Producers of "Beautiful Hair Breck" hair care preparations and the world's leading maker of liquid shampoos, the company has branches or affiliates in Canada, Bermuda, Mexico and Australia. The firm's major preparations include a series of specialized shampoos, hair sprays, hairdressing, permanent waves, hair colorings and an assortment of baby preparations. The eight-acre West Springfield facility, originally put into operation in 1952, includes a one-story brick building containing 70,000 square feet of floor space, extensive outdoor loading areas, a private railroad siding and one of the most modern truck loading facilities in the area.

"What You Should Know About Your Town"

"The helpful kind of patriotism is the kind that grows out of a knowledge of one's town, of her growth, her people, her property, her government and her needs. This knowledge develops, first, an intelligent interest; then, a sympathy; then a reasonable affection; a wise and temperate jealousy for her good name and a wish that she may prosper and grow beautiful; and, finally, a desire to help her to become greater and finer, a bright and clean workshop and a home for the best of men and women."
—John Cotton Dana.

 School Nurse — Mrs. Marian K. Martin.
 School Physician — Dr. Harry L. Roberts.
 School Dentist — Dr. David Webber.

RICHARD SALTER STORRS LIBRARY

Stephen Williams, the "Boy Captive of Old Deerfield," Longmeadow's first minister, spoke in his diary in 1754 of a library being formed. This was later dissolved, but in 1796 another was started and the original charter is among the treasured possessions of the Storrs Library.
 In 1839 came the Young Men's Library, the Longmeadow Lyceum; each group operating for a short time in various places. In 1895, the state offered \$100 to encourage small town libraries and it was voted to accept the gift, giving an impetus to the town's growing interest in books. The library has been in continuous operation since that time.
 In 1907, Miss Sarah Storrs, a descendant of Longmeadow's second minister, left a sum of money, her home and land (which includes the park used by the town for its ball field) to the library association. From then on, the library was known as the Richard Salter Storrs Library in memory of her antecedents.
 In 1932, the present library at 693 Longmeadow Street was built, costing the town nothing for the building, its furnishings and equipment. The town, however, contributes by taxation to the running expenses. The decor of the interior includes copies of antique museum pieces, lamps, draperies and rugs in keeping with the Georgian Period, creating a homelike, welcoming atmosphere; and the wall coloring corresponds to that used in the Williamsburg buildings. The architect was Smith and Bassett of Hartford and the builder, the William J. Quinn Company of Longmeadow.
 The library, since the dedication of its new building in 1933, has circulated over one million and three quarters books and the circulation in 1960 totaled 81,126.
 The Adult Department is open: Mon. through Sat., 2 to 5 p.m.; Mon., Wed., Fri., eve. 7 to 9 p.m. Office open, service available — Mon., Tues., Sat., mom. 10 to 12 pm.
 The Juvenile Department is open: Mon. through Sat., 2 to 5 p.m.; Mon., Fri., eve. 7 to 8 p.m.; Sat. mom. 10 to 12 p.m.
 Telephone — LO 7-5500.
 Librarian — Ruth E. Oldfield.
 President Library Association — Alan S. Lincoln.

LONGMEADOW HISTORICAL SOCIETY

The Longmeadow Historical Society was organized June 3, 1899 and incorporated November 3, 1900. The Society was formed "to secure and preserve historical papers, and to make collections and preserve same: of documents, furniture and articles of the life of past and present days of this neighborhood and in general to develop among its members an interest in

the history of Longmeadow, and to encourage the expression of such interest in all suitable ways."

The Storrs House, next to the library, is the home of this Society. Its president, Alan S. Lincoln, is also president of the Library Association. The building is open for inspection during the summer months and by appointment with the librarian at the library throughout the rest of the year.

A SUMMARY

Compiled by Charles L. Merrick, chairman of the editorial board of the forthcoming (1963) history of Wilbraham, in collaboration with Arthur A. Binder, chairman of the Wilbraham Industrial Development Commission.

Wilbraham, Mass.**Location**

The town lies between and adjacent to Springfield and Palmer. The two principal east-west highways pass through the town: transcontinental route U S 20, and the Massachusetts Turnpike.

Elevation

Main Street at Springfield Street, 290 feet, highest point, 937 feet.

Governmental District

Congressman, Second Cong. Dist.
State Senator, Worcester-Hampden Dist.
Rep. in Genl. Court, First Hampden Dist.

Form of Government

Direct town meeting.

Population

Unofficial result of 1960 U S Census, 7,356.

Area

22.22 square miles.

Assessed Valuation

\$13,650,000 based on about one-third of true value (1960).

Tax Rate

\$65.00 per \$1,000 (1960).

Bonded Debt

Water, \$125,000; Schools, \$735,000 (Dec. 31, 1960).

Post Office Receipts

\$48,000 (1960).

Churches

4 Protestant and 1 Roman Catholic.

Banking Service

Ludlow Savings Bank Branch.

Building Construction

102 new permits issued, value \$1,568,000; 57 alteration permits, value \$46,800.

Newspaper Service

Supplied by publishers in Springfield, Palmer and Ludlow.

Railroad Service

Boston & Albany division of New York Central R R.

Public Utilities

Telephone: New England Tel. & Tel. Co.

Electricity: Worcester County Electric Co., now called the Massachusetts Electric Co., from its Palmer branch.

Gas: the northwest area of town is supplied by the Springfield Gas Light Co.

Amusements

1 drive-in theatre, 1 bowling alley, 1 country club (private).

Recreational Facilities

1 day camp, 2 swimming and athletic schools, Nine Mile Pond bathing and boating, Lions Club Spec Pond bathing beach, athletic, swimming, stage and auditorium facilities of the schools.

Motels

7 along route U S 20.

Public Library

One.

Schools

1 private academy, 4 private kindergartens, 3 elementary schools provide 47 classrooms for 1400 pupils, each with its own cafeteria, auditorium, and both indoor and outdoor athletic facilities; 1 regional high school (Wilbraham being five-sevenths of the Hampden-Wilbraham Regional School District) providing 32 teaching stations for 675 pupils, auditorium seating capacity of 1,000, cafeteria, extensive outdoor athletic and complete indoor facilities, including swimming pool.

Department of Defense

Fire: 2 modern stations, 2 full time firemen, 37 volunteer firemen, 1 ambulance, 5 pieces of modern apparatus.

Police: 2 cruisers, 5 full time officers.

Public Works

61 miles of highway, all of which is paved. Water purchased from the Boston Metropolitan District Commission is distributed by the town to the areas of densest population except the northwest corner of the town, which is supplied and serviced by the City of Springfield. Average daily consumption from the town's mains is about one-third of a million gallons. Sewer facilities are available in portions of the north part of the town near the Chicopee River.

History

Originally (as the pale-face reckons time), the area now called Wilbraham was a part of Springfield, most of it being the former Middle or Second Division of "the Outward Commons on the east side of the Grate River", and was commonly referred to as "the mountains" because of a chain of hills in the eastern half of the territory, extending from the Chicopee River southerly well into Connecticut.

The first settler came into this area from Springfield in 1731, and ten years later the population was sufficient for the establishment of the Fourth Precinct of Springfield with its own church and minister. The growth in population continued to such a point that an act was passed by the colonial General Court incorporating the Town of Wilbraham, effective on June 15, 1763.

The territory described in this act of incorporation included not only the present Wilbraham, but also the present town of Hampden. By 1878, the government-conscious populace had wearied of travelling the considerable distances necessary to attend town meetings in first the "North Parish" and the next year in the "South Parish", so the South Parish was set off from the North and incorporated as the Town of Hampden.

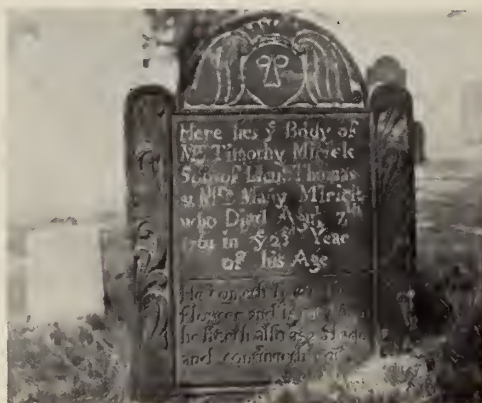

Essentially a farming community until the last quarter-century, the years of Wilbraham have witnessed the valley golden with ripening rye, dairy cattle grazing over most of the entire area, superior quality apples and peaches from the hillsides being shipped to Springfield, New York, the White House — even to Florida and the Pacific Isles — and in more recent times extensive turkey and chicken raising. Prior to the devastating sweep of the chestnut blight over this part of the country about the time of World War I, lumber and railroad ties were important products of the farms.

However, industry found a source of power in the streams of town: the Chicopee River along Wilbraham's north boundary, Twelve Mile Brook in the eastern section, and the Scantic River in present Hampden. These streams have provided both water and electric power for the manufacture of woolens, hats, paper (some of it used in the making of United States currency), lumber, driers, grain products and plastics.

The people of Wilbraham were never hothered by the Indians of the area. Their essentially peaceful life was interrupted by the expected participation in the Colonial Wars, the Revolutionary War, the underground railroad, the Civil War and the conflicts of this century. But Shays' Rebellion was a different matter because numbers of Shays' men spent the night in town before marching against the United States Arsenal in Springfield the next day. It was the warning brought from Wilbraham by a rider on horseback travelling through the fields and forests that enabled the government's forces to adequately prepare to end Shays' Rebellion so quickly.

The first residential sub-division development commenced operations about 1920. For several years thereafter, the number of developments increased quite slowly, because farming still flourished. But as migration to cities and enticements of industry increased, so did the number of developments, and farming decreased. Following World War II, subdivisions appeared rapidly, with the result that during the last fifteen years particularly, the nature of the town has changed from many small general farms to a relatively few but larger and specialized operations. The changes brought the first part of the town water system in 1926, and the start of the now adequate zoning bylaws in 1928.

"ON SPRINGFIELD MOUNTAIN"

The death of this "likely youth nigh twenty-one" as the result of the bite of a "ratel snake" in 1761 provided the theme of the ballad commemorating "this fatal axcident" which is sung by school children throughout the United States, and is found in the record albums of several prominent singers of ballads.

THE FIRST METHODIST CHURCH

Built in 1793, this church building has been used as a residence for the last 125 years. The plaque beside the front door reads in part: Oldest Methodist meetinghouse standing in New England. Bishop Francis Asbury held a Methodist Conference here, September, 1794. First New England Conference here, September, 1797. Home of Wilbraham Methodists 1793 to 1835.

WILBRAHAM ACADEMY

Founded under the aegis of the New England Methodist Conference in 1817 as Wesleyan Academy in Newmarket, N.H., and moved to Wilbraham in 1825, it continued to be coeducational until its reorganization in 1911, when it became Wilbraham Academy — a school for boys. This academy has exercised a world-wide influence through its part in the education of an imposing list of distinguished graduates, including preachers, educators, businessmen, diplomats. One of them gave the United States its strongest claim on the Oregon Territory; another founded Temple University in Philadelphia; another was recently ambassador from Thailand to England; another was similarly ambassador from Thailand to the United States. With new additions to its buildings and enrollment, the academy continues its important role in the field of secondary education.

THE WILBRAHAM POST OFFICE

Of appropriate colonial architecture and erected with private funds solely for post office use, this splendid office represents the ultimate in cooperation by private enterprise with a government agency for the good of the community. The Soldiers' Monument is a Civil War Memorial.

TOWN OFFICES

Built in 1905 as the schoolhouse of District No. 8, and remodelled in 1951, the building houses the offices of the town officials and the civil defense administration.

MEMORIAL SCHOOL

The first of the fully equipped elementary school buildings to be completed, Memorial School, honoring the dead of World Wars I and II, was built soon after the close of the second war. It accommodates 600 pupils in 21 classrooms and provides the auditorium requirements for town meetings, social programs, and a wide variety of public gatherings.

FRIENDLY ICE CREAM CORPORATION

This recent addition to the business population of Wilbraham chose a spacious site for its fine manufacturing plant and administrative headquarters of its 53-store system of company-owned outlets. Its owners were impressed with the excellent location of the town both geographically and in relation to main highways, and learned that the term "friendly" applies also to the people of Wilbraham.

R for BETTER BUSINESS

If your business is in a slump,
we prescribe an ad in the DIR-
ECTORY—it will bring results.

Gas

THE MODERN INDUSTRIAL, COMMERCIAL and RESIDENTIAL FUEL

Operation of a modern plant or store requires top grade services — they are important to profits, employee morale and customer satisfaction. Gas is the modern fuel for heating, air conditioning, water heating and various special uses. Gas can make money and friends in the long run — that's the reason why so many businessmen are including Gas equipment in their remodeling or building plans.

Your home, the house where your family can live and enjoy modern comfort in safety is an important mark of a man's success. It is natural that Gas, the modern fuel, is preferred for so many uses. "Only Gas is better, faster, cheaper" — and service is free.

For business and home, get the facts about Gas, for . . .

Central heating — clean, silent, service free

Air conditioning — modern, efficient, simple

Incineration — fast, clean, inexpensive

Refrigeration — quiet, dependable, economical

Water heating — low cost, fast, effective

Space heating — portable or stationary, economical

Cooking — fast, modern, dependable

Special uses — call us for any special fuel problem you have—our engineering department is at your service to help you get the best answer

DRIVE YOUR ADVERTISING SHOTS HOME

A thunder of hoofs—a resounding smack—and another shot is driven home. Your ad in the Directory will be just as effective . . . a “thunderous” headline—a “smack” in your copy—and your story is driven home—to the thousands of daily Directory users.

High Hurdles. . . .

In business as well as in sports there are High Hurdles to overcome. Your ad in the Directory, where multitudes will see it, will help to overcome many of the business hurdles.

FISHING IN THE RIGHT SPOT?

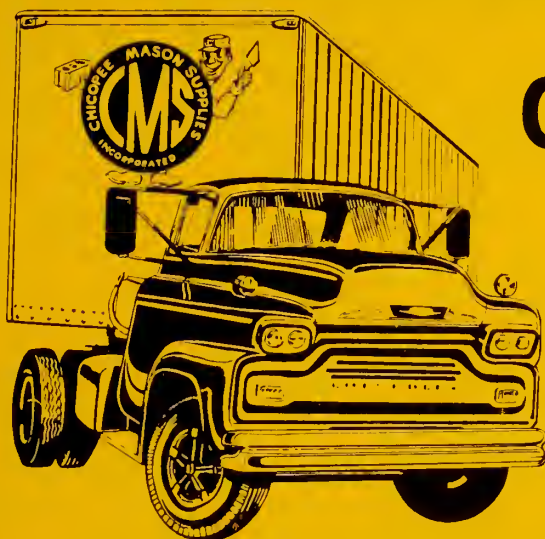

Have you ever noticed a dejected fisherman sitting for hours, without even a nibble — and the small boy fifty feet away pulling in the big ones?

It's just a case of fishing in the right spot. The directory is the right spot for your advertising — it will produce the results — the big ones.

use your Directory - the RIGHT SPOT

Names Appearing In Black Letters

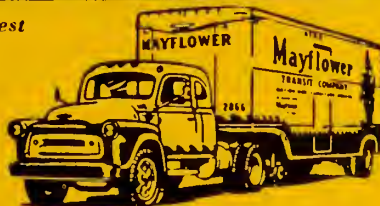

IN THIS DIRECTORY are the names of those people who ACCOMPLISH THINGS and are entitled to favorable consideration, if for no other reason than their public-spirited support of measures which make for progress. They represent that ENERGY AND PUSH so essential to the commercial prosperity of the City, and in dealing with them no mistake will be made. The publishers are honored in thus making them better known to the public.

R for BETTER BUSINESS

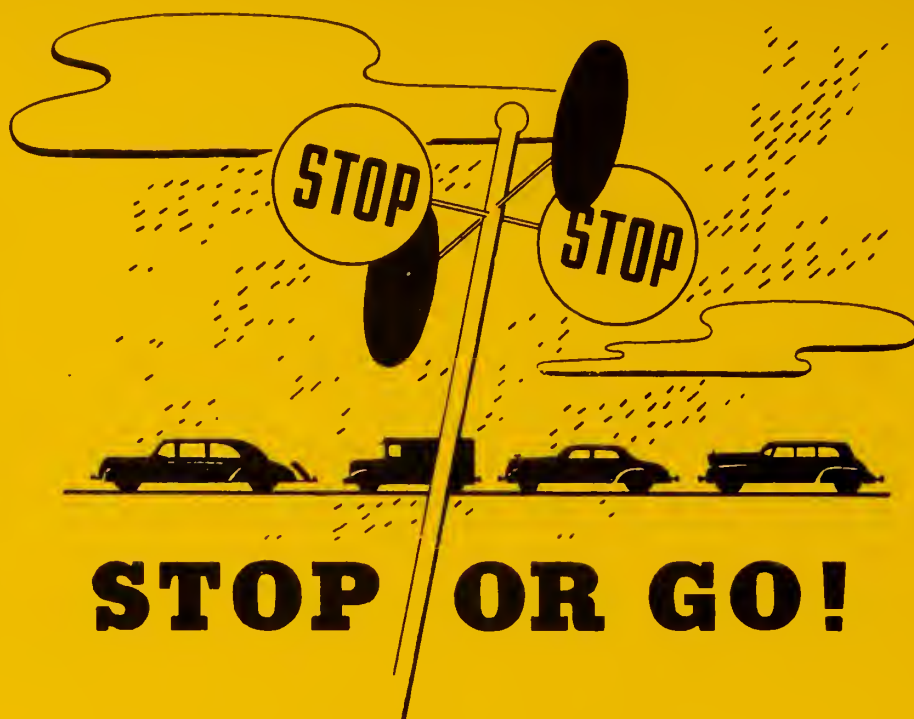

If your business is in a slump,
we prescribe an ad in the DIR-
ECTORY—it will bring results.

High Hurdles. . . .

In business as well as in sports there are High Hurdles to overcome. Your ad in the Directory, where multitudes will see it, will help to overcome many of the business hurdles.

STOP OR GO!

Red means Stop—Green means Go. Your ad in the Directory is the Green signal to Go—and the results will be a Green light all along the way.

THE SIGN OVER YOUR DOOR

Is a good thing, isn't it? You would not think of doing business without it.

BUT IT IS ONLY SEEN BY THOSE
WHO PASS YOUR WAY

If you could put a sign where everyone could see it would it interest you?

THE CITY DIRECTORY

Is where people look for you when they want to do business. You should make it easy for them to find you, by putting such information as a buyer wants, in the Directory properly indexed under all headings where he might look for you.

To be properly registered costs less than to be left out

The Mortality of Advertising

The waste basket is the grave of millions of dollars worth of advertising every year. Keep your advertising out of the waste basket by using mediums that are not thrown away. The City Directory is on the job 365 days in the year and no level headed man will think of the waste basket and the City Directory at the same time.

THE LOGICAL PLACE TO LOOK FOR IT

Think of the **DIRECTORY** when you are looking for names and addresses and street locations. It's the logical and quickest place to get the information you want. Use the **DIRECTORY**.

WEST SPRINGFIELD NUMERICAL DIRECTORY

EXPLANATORY NOTES

The streets are arranged alphabetically with their descriptions, each description followed by a numerical arrangement of householders, places of business and street intersections. (Arranged by rotation where no numbers have been assigned.)

The abbreviation "r" between the street number and the name signifies "rear."

The word "vacant" after a number signifies that the house, office or store at that number was vacant when the canvass was made.

△ Indicates telephone at this number.

"Right even" after street description indicates even numbers on right side of street.

The symbol © following a householder's name indicates that information has been secured during the canvass that the house is owned by some member of the family, but as the publishers cannot and do not guarantee the correctness of the information furnished, nor the complete absence of mistakes, no responsibility for errors can be or is assumed, nor can the publishers furnish further information than that shown.

Common Sense

About City Directory Circulation

THE true value of advertising circulation is circulation consulted.

TO be exact by actual survey in twenty-four average American cities by actual count each city directory averaged three and one-half consultations for each business day.

TO be conservative we will eliminate the sixty Sundays and Holidays when no tests were made.

FOR every thousand directories sold there will be an average of three and one-half daily consultations for each book for three hundred and five days, therefore—

$$1000 \times 3\frac{1}{2} \times 305 = 1,067,500$$

**Consultations or
Circulation Consulted**

Names Appearing In Black Letters

IN THIS DIRECTORY are the names of those people who ACCOMPLISH THINGS and are entitled to favorable consideration, if for no other reason than their public-spirited support of measures which make for progress. They represent that ENERGY AND PUSH so essential to the commercial prosperity of the City, and in dealing with them no mistake will be made. The publishers are honored in thus making them better known to the public.

. . . Patronize Them

High Hurdles. . . .

In business as well as in sports there are High Hurdles to overcome. Your ad in the Directory, where multitudes will see it, will help to overcome many of the business hurdles.

— I AM —

I sit in the castles of business and at the hearthstones
of many homes, mighty in my power to serve.

Through me is the power to make people talk with intel-
ligence concerning their communities.

With extended hand I guide the wearied traveler, and
to others shorten the distances between destinations.

In me abides the essence of democracy, as side by side
is found all nationalities, rich and poor alike.

With uncanny certainty I unite long-lost friends and make
glad the missing heirs.

Through me are protected the law-abiding by tracing the
criminal to his hiding place.

Through me, in the friendliest way, new trade channels
are opened.

I am the key that unlocks the gate to what your com-
munity is, for all who would pass its portals.

I Am Your City Directory

They
**LOOK FOR THE ANSWER
IN THEIR DIRECTORY**

Where can I buy it—where can I
get the information?
These and many other questions
are answered in the Directory—
and it's so easy.

Just turn to the proper alphabetical and classified
listing and you have the answer—
